The following will assist in the design of an economical solution to your Lube Oil Vent Mist Eliminator application. Please provide all known information in the spaces provided and/or attach any supporting documentation. Please email or fax to us for a prompt response.

**Process Data**

		<b>Normal Operating Case</b>	<b>Maximum Operating Case</b>	<b>Minimum Operating Case</b>
Pressure	psia			
Temperature	°F			
Gas flow rate	lb/h			
Gas density	lb/ft <sup>3</sup>			
Gas viscosity	cP			
Gas MW	lb/lbmol			
Liquid flow rate	lb/h			
Liquid density	lb/ft <sup>3</sup>			
Liquid viscosity	cP			
Liquid surface tension	dyne/cm			
Liquid composition				
Estimated particle size distribution	micron

## Mist Eliminator Design

Proposed material of construction for this project

---

### Exhaust Vent Size

We can include matching 150 lb ANSI flange mating dimensions on the inlet and exhaust nozzles of the mist eliminator.

Pipe:	Nominal diameter (in.)	Schedule	Flange rating
-------	------------------------	----------	---------------

---

### Fan/Blower

Use existing fan/blower	Yes	No
Specifications of existing fan/blower		

Brand Model

Koch-Glitsch to supply fan/blower with mist eliminator	Yes	No
Preferred location of exhaust fan/blower	Before mist eliminator	After mist eliminator

---

### Performance Required

Desired efficiency objective

Maximum allowable pressure drop in.H<sub>2</sub>O

Other performance needs

Remove

% at

micron

---

### Comments:

Please provide any additional information that will help with your design and describe any documents you will send. Include relevant drawings of existing equipment so that we may design a compatible solution.
